Delphi TRAINING ACADEMY

FROM ONLY
£235

12 MONTHS ACCESS
CALL FOR MORE
INFORMATION

An e-learning platform that provides technicians with the ability to enhance their skills and knowledge across a wide range of topics.

8 MAIN TRAINING COURSES:

- Hybrid & Electric Vehicles
- ADAS
- Exhaust & After treatment
- Petrol Systems
- Diesel Systems
- Chassis Systems
- Vehicle Electrics
- Other Systems

FEATURES:

- **300+ individual training modules**
- Extensive video content filmed in real world workshop environment
- Interactive text and questions
- Engine simulator
- Training Needs Analysis questionnaires
- Own training profile containing all certificates earned
- Mock tests for IMI accreditation
- Designed for all devices including tablets and mobiles

All prices in this publication exclude VAT @20% Items are offered for a limited time while stocks last. Price and availability are subject to change without notice. Lease terms & conditions available upon request Credit is subject to status and is only available to UK residents aged 18 and over. AFTERMARKET SUPPORT

HELLA MEGA MACS PC SE

PART NO: GEQ010606801

Whilst still including all the features of the original tool, the mega macs PC Second Edition now adds DoIP & CAN-FD capability. This means that later models from manufacturers such as Volvo (2016 on) & Jaguar/Land Rover (2017 on) can be diagnosed.

The mega macs PC SE also provides integrated security gateway access across 18 popular vehicle makes with exclusive BMW coverage added in August 2024.

- Fault code explanation with possible causes
- Reduced repair times & fast trouble-shooting
- Allows independent workshops to offer a one-stop solution to their customers
- Further extends workshop capabilities to dealer level

ONLY
£2,625

FREE DEMOS &
AFTERMARKET SUPPORT

HELLA MACS REMOTE

PART NO: GEQ015705091

macs Remote is a remote diagnostics device that makes any repair possible, regardless of vehicle make or model. It enables coding and programming tasks to be carried out that would otherwise require a visit to the dealer.

- Complete remote repair solution supported by a team of master technicians using OE Tools
- Further extends workshop capabilities to dealer level
- Dramatically reduces key to key times
- Cost effective pay as you go system
- No ongoing license charges

KEY FEATURES

- Remote calibration, software updates and programming

ONLY
£845

BOSCH

PART NO: 1987P12913 + 1687P15133 + GEQKTS590PROMO2

ESI[tronic] Evolution diagnostic software enables workshops to carry out maintenance, service and repair work quickly, efficiently and effectively. The diagnostic software covers a wide range of vehicles worldwide. Thanks to the data packages with their modular licencing options, workshops can extend their diagnostic software individually to suit their individual requirements with additional options. ESI[tronic] Evolution makes it possible to perform comprehensive diagnostics, to find the right repair solution and to reset faults.

- ESI[tronic] Evolution software
- Secure Diagnostic Access included
- Modular licencing options
- Fast trouble shooting
- 150 brands covered.
- Maintenance diagrams
- Circuit diagrams

BENEFITS OF THE KTS590

- Support of all current vehicle interfaces based on Ethernet and parallel operation of several BUS systems, including JLR vehicles
- Advanced PassThru interface for programming
- Works on any Windows 10 OR 11 PC on which the Bosch diagnosis application ESI[tronic] Evolution is installed and licensed
- Mobile and stable operation thanks to powerful Bluetooth interface
- Up to three CAN and K-Line interfaces can be used at the same time
- Wireless Bluetooth connection to the workshop PC allows increased coverage enabling mobile use throughout the workshop
- Rugged construction for long-term everyday workshop use
- KTS 590 also includes a 2-channel oscilloscope

OFFER PRICE KTS 590 WITH 3 YEARS MASTER PACKAGE SOFTWARE £3,822

BOSCH KTS & ESI(tronic) EVOLUTION SECURE DIAGNOSTIC ACCESS - SDA

ACCESS DENIED?

Many vehicle manufacturers now restrict diagnostic access to their electronics and systems, meaning that everyday maintenance tasks, calibrations and even service resets are only possible with a dealer tool, posing a significant challenge to independent workshops and technicians:

- Numerous tools and software subscriptions required
- Multiple logins and payment concepts
- Costly, confusing and complex

THE SOLUTION – BOSCH SDA

Bosch SDA (Secure Diagnostic Access) provides access to vehicle manufacturer-protected systems, via a one-time registration. With over 20 manufacturers already included at no additional cost, SDA is the key! A compatible KTS and ESI[tronic] subscription are required.

- One combined hardware & software solution
- One single login and registration for all participating manufacturers
- SDA is already included with all ESI[tronic] Evolution main package subscriptions

VEHICLE MANUFACTURERS COVERED:

Abarth	Mercedes-Benz
Alfa Romeo	Nissan
Audi	Polestar
Chrysler	Porsche
Dacia	Renault
Dodge/RAM	Seat/Cupra
Fiat	Skoda
Ford	Subaru
Hyundai/Kia	Suzuki (from August 24)
Jeep	Volvo
Lancia	VW

With more planned for the near future inc. BMW, Iveco, MG!

Restricted access to diagnostic features
requires multiple registration and payment options

Secure Diagnostic Access (SDA)
part of ESI[tronic] Evolution

Unrestricted access and trouble-free diagnosis
for various vehicle manufacturers and models

This means for
ESI[tronic] users:

- Simple Solution
- Cost Benefit
- Time Saving
- Future Proof

Offer ends 31/12/24

■ DELPHI DS480 KIT

DS180 VCI, TABLET & 1 YEAR SOFTWARE
PART NO: GEQSV60251 + GEQSV60270

The next generation of diagnostics features expanded vehicle coverage, additional functionality, integrated support and Secure gateway access is included in the software subscription.

- Secure gateway solution
- To service security protected vehicles
- Pass-thru J2534 compliant
- For quick and easy access to OEM data
- Integrated technical information
- Everything you need at your fingertips
- Full system scan
- Access to all functionality
- Integrated DOIP/CAN-FD
- No Adapters needed
- ADAS Calibrations
- Procedures included in software
- Continuous software development

NORMALLY
£3,399

ONLY
£2,899

■ DELPHI DS180 VCI & 1 YEARS SOFTWARE

PART NO: GEQSV60250 + GEQSV60270

Continuous software development.

INCLUDES

- 12 Months car software, with VRM look up
- Gateway access included
- VTI Technical data upgrade available with a 3 user license
- Requires Windows 10 or 11 Laptop or Tablet, available from GSF at extra cost
- Truck software also available at extra cost

NORMALLY
£2,100

ONLY
£1,899

BLUETECH FEATURES

Flight recorder:
Perfect for a one-man road test Select your parameters, hit "Record" and review when back in the workshop. With its 4GB Internal storage capability, enjoy even more space to record all the data you need.

WIFI and Bluetooth connectivity to the PC:
Wireless communication providing freedom to work anywhere in the workshop, whilst maintaining a seamless connection to the vehicle.

360° Multi colour indicator:
Lets you check the status of the VCI at any time from every angle and position.

Integrated DoIP:
No need of any, DoIP adaptor cable. With its built-in functionality, the VCI can be plugged directly on DoIP communicating vehicles.

Universal:
VCI can be used for cars, light commercial vehicles, trucks, buses and coaches, trailers.

Pass-thru support:
Quick and easy access to OEM flash-programming services.

Battery voltage monitor:
Don't let a dead vehicle battery stop you working.

CAN FD channels:
Future-proof design to make the diagnostic possible on vehicles requiring this data-communication protocol.

DIAGNOSTICS

EVERYTHING YOU NEED TO KNOW ABOUT SECURE GATEWAYS

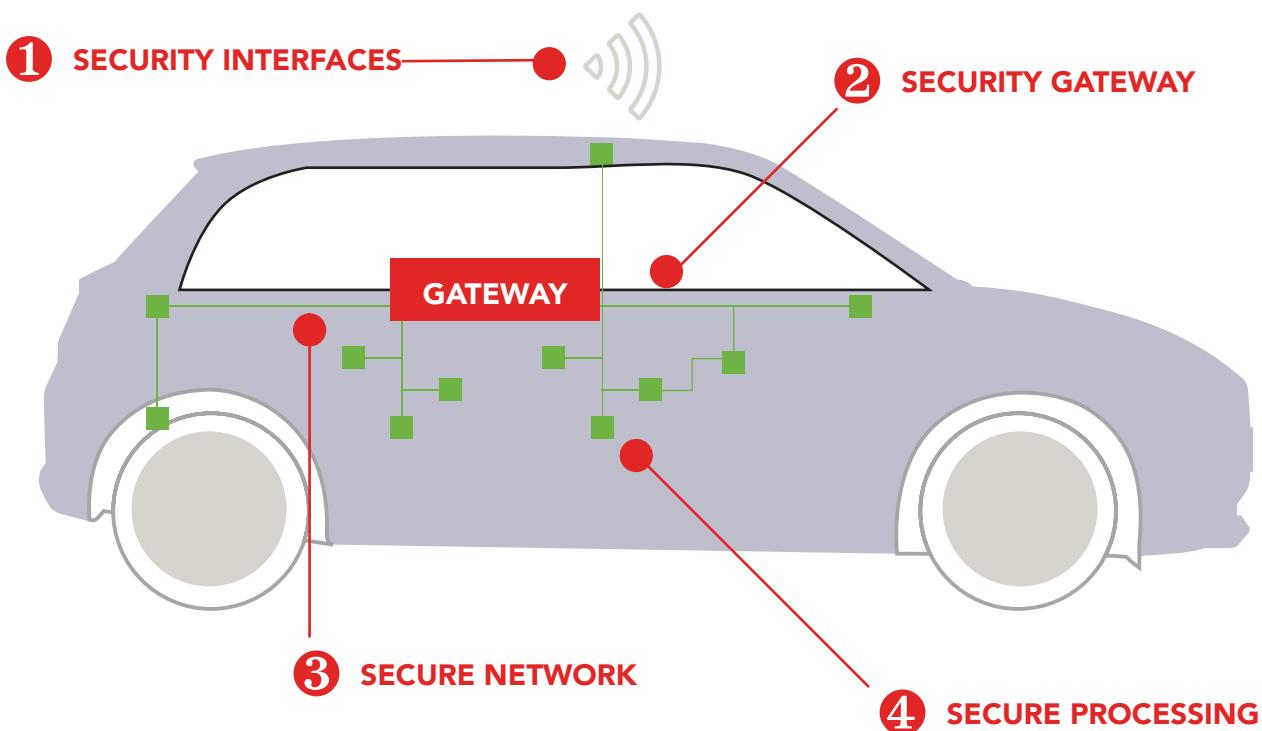

Vehicle Secure Gateways (SGW) act like firewalls for vehicle networks, preventing unauthorised access and protecting against external attacks. Access to certain functions requires authorisation from both the user and their diagnostic device, with variations in accessible functions across different OEMs.

To fully access OEM software portals, businesses and technicians need authorisation, which grants dealership-level privileges if they have the OEM interface. However, some technicians prefer aftermarket solutions offered by GSF's Diagnostic partners for accessing security gateways.

While SGW-equipped vehicles allow technicians to access data and Diagnostic Trouble Codes (DTCs), they restrict actions like DTC erasure, coding, calibrations, and actuator activations, impacting routine tasks such as service light resets and brake caliper adjustments.

SO WHY ARE OEM'S INSTALLING SECURE GATEWAYS

As cyber security concerns grow for OEMs, secure gateways are being integrated into nearly all new cars, complicating the use of aftermarket diagnostic tools. These secure gateways enhance vehicle protection against hacking by preventing unauthorised access and safeguarding the safety and privacy of vehicle owners in an increasingly interconnected environment.

WHICH VEHICLES HAVE SGW'S?

Since as early as 2017, OEMs started to develop and use DOIP (Diagnostics Over the Internet Protocols) and CAN-FD (CAN with Flexible Data-Rate). All manufacturers are moving over to these communication protocols as they provide higher bandwidth than conventional CAN-BUS and allow the implementation of high levels of security.

WHAT'S THE SOLUTION

If your current equipment is DOIP and CAN-FD enabled, you only need to upgrade your software package to include SGW. If your equipment does not support DOIP and CAN-FD, then you will need to upgrade your diagnostic equipment. Either way, GSF and our Diagnostic partners can support you with this.

WHAT OTHER METHODS CAN BE USED TO ACCESS SECURE GATEWAYS

PASSTHROUGH

- Block exemption regulations require OEM to allow access to data and technical information for Euro 5 vehicles onwards.
- Businesses must be registered with the OEM to access.
- Still restrictive to some security related functions but SGW granted

REMOTE DIAGNOSTICS

- Designed for remote ADAS and key calibration, it's a convenient way for a workshop to gain access through secure gateways.
- Enables a workshop to perform OEM component coding and programming, with payment based on an individual payment per-job booked basis.

SO, WHAT WAS THE SOLUTION AGAIN?

Contact your local GSF branch and one of our Garage Equipment Specialists can arrange a product demonstration or provide expert advice to future proof your business and deal with the latest technologies OEMs are implementing in their vehicles.

See the following pages for the latest equipment available today to deal with Security Gateway issues and coding and programming opportunities across all OEM's

HEATERS

■ THERMOBILE

MANUAL IGNITION BIO OIL HEATERS WITH FLUE KIT INCLUDED:

- 4 x 1m flue pipes, 2 x Adjustable wall fixing brackets, 1 x High temperature silicone rubber roof seal and fixing kit for profiled or corrugated roof and cladding
- Additional 1m flue pipe available
- Fast return on investment
- Efficient, virtually soot-free combustion
- Built in fuel tank, filters and pump
- Flame failure protection
- Overheat protection (except Bio B)
- Includes complete flue kit (roof seal, fitting kit & two wall bands); legislation compliant PG1/1 (04)
- Bio Energy 2 & Bio Energy 3 feature a burner draw system or easier lighting and cleaning plus a heat exchanger for higher efficiency

FINANCE OPTIONS AVAILABLE ON REQUEST

These heaters operate on these fuels:
Bio Diesel Oil, HVO, Processed Fuel Oil, Rapeseed, Linseed and some Vegetable oils

Manual ignition Bio Oil heaters must be connected to a suitable flue system (min height of 1m above roof apex and 6m above ground level). A full range of flue accessories are available.

I-LIGN WHEEL ALIGNERS

These Wheel Alignment options are tablet operated, tower-free systems, they're compact, significantly reducing workshop space requirement, and portable, making multi-bay use a breeze. They're operated from a tablet rather than PC, so the operator can see the display at all times when working around the car, and it is loaded with genuinely useful features such as Registration Plate vehicle look-up and Teq-link, a handy data sharing resource which can be used for all sorts of applications.

- CCD and 3D options offer a choice of technology
- 10" magnetic tablet connects via Wi-Fi
- Wireless measuring heads communicate via Bluetooth
